A securitization company can also create several compartments. Where rights relate to a compartment or have arisen in connection with the creation, operation or liquidation of a compartment, they are limited to the assets of that compartment.

The assets of a compartment are exclusively available to satisfy the rights of investors in relation to that compartment and the rights of creditors whose claims have arisen in connection with the creation, operation or liquidation of that compartment. As between investors, each compartment shall be treated as a separate entity, unless otherwise specified in the constitutional documents.
